

# Scholarships for Students

---

This webpage will be updated regularly with scholarship information for students. As new scholarships are added, they will be added to the end of the list. If a student or parent has a question about a scholarship, completing the FAFSA, or any requirements for college admission, please contact your school's guidance department. Danville Public Schools is committed to the success of all students as they enter college, the military, technical schools, and the workforce.

**PLEASE READ:** The most important step for any senior is to complete the FAFSA. This Federal form takes approximately 23 minutes to complete, is free, and completely secure. This form is required for many scholarship applications, but more importantly the completion of this form will enable a student to be eligible for grant opportunities to attend college.
